## DETAILED ACTION

### *Drawings*

1. The drawings filed on 03/25/2004 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Reference numeral 28 is not clearly found within the drawings. It appears that Fig. 4 may contain reference numeral 28, however, the text is not clear enough to make out the number.

Furthermore, if the reference numeral shown above is intended to be numeral 28, it is not indicating the proper part of the depression. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of

an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to under 37 CFR 1.83(a) because they fail to properly show reference numerals 18 and 22 as described in the specification. Reference numerals 18 and 22 in Figure 4 are directed to the wrong details of the invention. Channel 18 and holes 22 should be changed in Figure 4 to correspond with the other figures within the application.

Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top

margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### **EXAMINER'S AMENDMENT**

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David L. Tingey on March 19, 2008.

### ***Claims***

Please amend the claims as follows:

Claim 1—Cancel

Claim 4 – Delete [at least partially] from line 7 of page 5 of the amended claims.

### ***Reasons for Allowance***

5. The following is an examiner's statement of reasons for allowance:

6. Clamps for securing items to roof panels are widely know and used. Haddock (US 6,164,033), the closest cited prior art, discloses a similar device. Here an anchor

similar to the present invention is used to secure items to a roof panel; however, the anchor of Haddock lacks a rib bar.

The present invention is made patentably distinct by the combination of an anchor, setscrew, and rib bar. The interaction of the anchor and setscrew to tighten down on a non-deformable and separately unattached rib bar is what distinguishes the present invention from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
